REFECTOCIL EYELASH PERM Permanent Curl for Eyelashes

RefectoCil Eyelash Perm with collagen and cysteine gives your lashes a wonderful curl, letting the eyes appear larger and more expressive. At the same time the eyelashes are nourished. Unlike mechanical lash curlers **RefectoCil Eyelash Perm** gently forms the eyelashes with the curl lasting up to 6 weeks. Collagen is one of the commonly occurring structural proteins in the human body. Together with the amino acid cysteine, proved to contribute to hair development, these active ingredients nourish and protect the eyelashes during treatment, allowing them to appear groomed and fuller.

The application is simple, safe and takes about 45 minutes. With the choice of four different roller sizes you can achieve the perfect eyelash curvature for each customer – independent of eyelash length or eyelash form. **RefectoCil Eyelash Perm** provides a service in your salon that your clients will be enthusiastic about.

3 EASY STEPS TO BEAUTIFUL EYELASHES:

1. Eyelash Perm - 2. Eyelash Tint - 3. Eyelash Care

First you create the eyelash curl with **RefectoCil Eyelash Perm**. Then you tint the eyelashes with **RefectoCil Eyebrow and Eyelash Tint**. Note: After using the eyelash perm the application time of the eyelash tint is reduced to **only 2 minutes!** To complete apply **RefectoCil LongLash Gel** for optimum care of curled and tinted lashes. Used daily it intensively strengthens and nourishes lashes plus giving them a wonderful shine.

Before

After

INSTRUCTIONS FOR USE

APPLICATION TIME REFECTOCIL EYELASH PERM

The application times indicated in this folder refer to normal/thin eyelashes.

ATTENTION! Longer application times are necessary for thick/strong eyelashes:

LashPerm:	25 to 30 min.
Neutralizer:	15 to 20 min.
Tint after perm:	7 to 10 min.

Allergy Test: Before starting the treatment perform an allergy test. With a cotton swab apply a small amount of both lotions to the inside of the elbow or behind the ear. Let it dry and don't wash or cover the area for 24 hours. If skin irritations appear do not use the Eyelash Perm.

1. PREPARATION

First remove any contact lenses. Cleanse the eye area with **RefectoCil Eye Make-up Remover**. For optimum adhesion of the eyelash rollers, remove all oils from the eyelids and eyelashes with **RefectoCil Saline Solution**. Then pat dry with a cosmetic cloth. Before starting the treatment briefly brush the eyelashes to separate them.

Hint: To simplify the process you can cover the lower eyelashes with **RefectoCil SiliconePads** available separately. That way you assure that you affix only the upper eyelashes to the eyelash rollers.

2. SELECTING THE EYELASH ROLLER

The shorter the eyelashes and the more curl the customer desires, the smaller the roller you select.

Small Eyelash Rollers (S):

For short eyelashes

Medium eyelash Rollers (M):

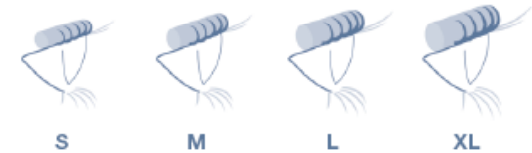

For medium-long eyelashes

Large eyelash Rollers (L):

For long eyelashes

Very large eyelash Rollers (XL):

For very long eyelashes

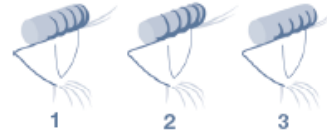

Forming Eyelash Roller

Applying Eyelash Roller

Tips for selecting the right size:

- You have selected the correct roller size when the eyelashes cover half of the roller circumference (**Fig. 1**).
- If the chosen roller is too small and the eyelashes too long the result will be a U-shaped curvature (**Fig. 2**).
- If the chosen roller is too large and the eyelashes too short the result is no curl or a weak curvature (**Fig. 3**).

3. APPLYING EYELASH ROLLER

Remove a self-adhesive eyelash roller from the foil. Only touch the ends of the roller so it does not lose its adhesive quality. By bending the roller several times the eyelash roller will achieve a form corresponding to the lid curvature (**Image 1**). If the eyelash roller is too long and extends beyond the lid edge you can trim it with scissors.

From now on the client has to keep the eyes closed until the end of the treatment! If necessary – gently stretch the eye lid with your fingers, first apply the eyelash roller at the inner lid edge – just above the base of eyelash (**Image 2**). Apply the other end of the eyelash roller at the outer lid edge, affix the roller with light pressure along the eye lid.

4. FIXING EYELASHES

Using the application stick, affix the upper eyelashes to the eyelash roller starting at the inner lid edge. With a winding upwards motion press the eyelashes evenly and straight onto the self-adhesive eyelash roller (**Image 3**).

Should the individual eyelashes adhere crossed over on the eyelash roller, carefully remove them and affix them in a straight line. With stubborn eyelashes or those that have come off apply

a small amount of **RefectoCil Glue** to the eyelash roller (**Image 4**) and affix the eyelashes again. After all eyelashes adhere perfectly straight to the eyelash roller ask the client to briefly open the eyes. Then you can see if any eyelashes from the lower lid adhere to the eyelash roller. If so, carefully remove them using the application stick, as only the upper eyelashes are being curled.

5. APPLYING LASHPERM

Squeeze a pea-size amount of **RefectoCil LashPerm 1** into the **RefectoCil Cosmetic Dish 1**. Using the **RefectoCil Cosmetic Brush 1** generously apply a strip of **LashPerm 1** to the center section of the eyelashes where the curl is required (do not apply at the base or tips of eyelashes) (**Image 5**).

Application time: **15 Minutes** (approximately)

Please Note: Depending on the eyelash structure the application time can be increased by 5 minutes (thick eyelashes) or reduced (fine eyelashes).

At the end of the application time remove **LashPerm 1** with a dry cotton swab (**Image 6**).

*Products are number coded on the tubes, cosmetic brushes and cosmetic dishes.
① with ① and ② with ②. This prevents contact of **LashPerm 1** with **Neutralizer 2** rendering them prematurely unusable through chemical reaction.*

6. APPLYING NEUTRALIZER

Squeeze a pea-size amount of **RefectoCil Neutralizer 2** into the **RefectoCil Cosmetic Dish 2**. Using the **RefectoCil Cosmetic Brush 2** generously apply a strip of **Neutralizer 2** to the same location as the **LashPerm 1** (Image 7).

Application time: **10 Minutes**

At the end of the application time remove **RefectoCil Neutralizer 2** with a dry cotton swab.

7. REMOVING EYELASH ROLLERS

Touch the eyelash roller several times with a moist cotton pad. The moisture slowly loosens the glue. If necessary, gently rub back and forth several times until the glue is totally dissolved. Gently stretch the eyelid and carefully roll the eyelash roller downward (Image 8). Dry the eye area with a cosmetic cloth.

Problem solving

- If the curve of the eyelashes is too strong, the selected eyelash roller was too small. Select a larger eyelash roller and repeat the process using half the application time.
- If the curve of the eyelashes is too weak reasons could be: application time too short (with **LashPerm** or **Neutralizer**), the roller too large, or eyelashes not cleansed correctly.
- An uneven result can occur when **LashPerm** or **Neutralizer** are applied unevenly, the eyelash roller not positioned correctly or the eyelashes were not attached straight to the eyelash roller.

Applying Neutralizer

Removing Eyelash Roller

II. EYELASH TINT

It is recommended to tint the eyelashes with **RefectoCil Eyebrow and Eyelash tint**. Applied directly after the eyelash perm a reduced application time of just 2 minutes applies. Providing amazing, looking eyelashes.

III. EYELASH CARE

To complete this service apply **RefectoCil LongLash Gel**. To groom, nourish and leave beautiful shiny, healthy lashes.

The final result for your client: the most beautiful eyelashes. With curvature, intensified colour and a beautiful shine, lasting – up to 6 weeks.

IMPORTANT INFORMATION:

LashPerm, Neutralizer: 10,5 ml. Best used before the end of (MMYY); see tube fold. After opening: 2 months. Always close the tube immediately after use.

Glue: 4 ml. Best used before the end of (MMYY); see container. After opening minimum: 3 months. Shake before using. Always close the container immediately after use.

Store products in cool and dark place. Always clean cosmetic brushes and cosmetic dishes immediately after use with **RefectoCil Saline Solution**.

Best used before the end of / Batch number: see container

ATTENTION: For professional use only. Follow the instructions. Avoid contact with eyes. In the event of contact with the eyes rinse immediately with plenty of water and seek medical advice. Wear suitable gloves. Keep out of reach of children. **LASHPERM** contains thioglycolate. **NEUTRALIZER** contains Hydrogen peroxide.

INGREDIENTS: LASHPERM: AQUA, CETEARYL ALCOHOL, THIOGLYCOLIC ACID, AMMONIA, HYDROLYZED COLLAGEN, SODIUM CETEARYL SULFATE, PEG-40 CASTOR OIL, CETEARETH-20, PARFUM, CI 47005, CITRONELLOL, LINALOOL, ALPHA-ISOMETHYLIONONE, GERANIOL, CYSTEINE. **NEUTRALIZER:** AQUA, CETEARYL ALCOHOL, HYDROGEN PEROXIDE, SODIUM LAURETH SULFATE, CITRIC ACID, SODIUM PHOSPHATE, PHENACETIN, PARFUM.
